Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This application claims priority to a US provisional application, serial no. 60/104,032, filed on October 03, 1998.

The amendment in paper no. 8, filed on May 11, 2001, is acknowledged.

Claims 1-3, 7 and 9 are presented for examination.

No new grounds of rejections are applied.

Applicant's arguments filed on May 11, 2001, paper no. 8, have been fully considered but they are not persuasive.

Claim rejection

- The following is a quotation of the **second paragraph of 35 U.S.C. 112**:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 9, Applicants left out the measurement unit for the lower ranges of 0.1.

Do Applicants intend "pg" or "ng" or "µg" or "mg" or "g"?

Applicants argue that the claim language is clear in view of the disclosure.

However, it is unclear as to whether the lower range is in picogram^s, nanogram^s, microgram^s, milligram^s, or gram^s.

- The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1617

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 7 and 9 are rejected under **35 U.S.C. 103(a)** as being unpatentable over Langer, and Udell (See IDS of Jan. 24, 2000).

Langer teaches a method to reduce blood pressure by losing weight. See Langer, Clinical and exper. Hypertension, (See IDS of Jan. 24, 2000), page 1132, lines 8-10.

Udell teaches and sells CLA (conjugated linoleic acid), including the cis-9, trans-11 isomer of octadecadienoic acid, for weight loss. (See IDS of Jan. 24, 2000), See the entire document.

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to use CLA in the method of reducing blood pressure by losing weight of Langer to achieve the beneficial effect of weight loss by taking CLA in view of Udell.

✓ As to claim 9, It is well known in the art to determine the appropriate intake dosing by monitoring blood pressure, and body weight individually in order to achieve the treatment of hypertension.

✓ Applicants' argue that there is no motivation to combine. However, motivation is provided.

Claims 1-3, 7 and 9 are rejected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1617

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Helen Nguyen whose telephone number is (703) 605-1198. The examiner can normally be reached on M-F (9:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minna Moezie can be reached on (703) 308-4612. The fax phone numbers
